

LELAND® THOMSON REUTERS PRIVATE EQUITY BUYOUT INDEX FUND

CLASS A: LDPAX | CLASS C: LDPCX | CLASS I: LDPIX

MUTUAL FUND INVESTMENT APPROACH

The Fund is a passively managed 1940 Act mutual fund that aims to provide investment results that, before fees and expenses, correspond generally to the price performance of the Thomson Reuters Private Equity Buyout Index (TRPEI). The Index seeks to replicate the aggregate gross performance of U.S. private equity-backed companies.

Passive Index Replication: The Fund seeks to replicate the Thomson Reuters Private Equity Buyout Index using a model based approach.

Performance and Risk Measures

Past performance is no guarantee of future results. Investments cannot be made in an index. The index data shown does not reflect or compare features of an actual investment, such as its objectives, costs and expenses, liquidity, safety, guarantees or insurance, fluctuation of principal or return, or tax features.

1) Performance at net asset value ("NAV") does not include the effect of sales charges. Class A share performance, including sales charges ("LOAD"), reflects the maximum applicable front-end sales load of 5.75%.

2) Correlation is since inception of LDPAX, 9/18/2015.

Indices

The **Thomson Reuters Private Equity Buyout Index** ("TR PE Index") seeks to replicate the performance of the Thomson Reuters Private Equity Buyout Research Index ("TR PE Research Index") using liquid public securities across the sectors in which U.S. private equity invests.

The **TR PE Research Index** measures the aggregate gross returns of the U.S. private equity-backed companies, using Thomson Reuters Private Company Data.

The **S&P 500 Total Return Index** is the total return version of the S&P 500 Index which includes the effects of reinvested dividends.

The **S&P 500 Index** is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Glossary of Terms

Correlation is a statistical measure of how two securities move in relation to each other.

Risk Factors

Mutual funds involve risks including the possible loss of principal. The Fund may invest in ETFs, ETNs and mutual funds, which are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. ETFs, ETNs and mutual funds are subject to issuer, fixed income and risks specific to the fund.

Private equity investments involve a greater degree of risk; as a result, the Fund's returns may experience greater volatility than the overall market. The Fund does not invest in private equity funds nor does it invest directly in the companies funded by private equity funds.

The Fund seeks to generate returns that mimic the aggregate returns of U.S. private equity-backed companies as measured by the Thomson Reuters Private Equity Buyout Index ("TR PE Index"). There is a risk that the Fund's return may not match or achieve a high degree of correlation with the return of the TR PE Index. Additionally, the TR PE Index's return may not match or achieve a high degree of correlation with the return of U.S. private equity-backed companies.

Investments in equity securities are subject to overall market risks. To the extent that the Fund's investments are concentrated in or significantly exposed to a particular sector, the Fund will be susceptible to loss due to adverse occurrences affecting that sector.

Loss may result from the Fund's investments in derivatives. These instruments may be illiquid, difficult to value and leveraged so that small changes may produce disproportionate losses to the Fund. Over the counter derivatives, such as swaps, are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligation. In certain circumstances, it may be difficult for the Fund to purchase and sell particular derivative investments within a reasonable time at a fair price.
